SUMMARY

Software Engineer with experience in data eng., data science, and DevOps, focused on model deployment, scalable ETL pipelines, and CI/CD. Recent M.Sc. Computer Science graduate from Georgia Tech, specializing in Robust and Causal ML[†], with a strong interest in data/ML eng., cloud-based microservices, and kubernetes-integrated systems.
Location: Atlanta, GA | **Work Auth.:** F-1 OPT (valid through Dec. '26, extendable to Dec. '28).

EDUCATION

M.Sc. Computer Science @ Georgia Institute of Technology **GPA: 3.78 / 4.0 | Dec. 2025**

- **Teaching Assistant:** Reinforcement Learning ([CS8803](#), [CS7642](#) Fall '24 — present).
- **Coursework:** Machine Learning, Systems for ML, Database Systems, Computer Networks, OS, Algorithms

M.Sc. Communications Eng. @ Technical University of Munich, Germany **GPA: 3.65 / 4.0 | June 2021**

B.Sc. Electrical Eng. @ National University of Sciences & Technology, Pakistan **GPA: 3.59 / 4.0 | June 2017**

SELECTED PUBLICATIONS

[†]**U. Akbar et al.** “Symmetry-Constrained Causal Partial Identification.” *under review @ NeurIPS*, 2026.  

[†]**U. Akbar et al.** “An Analysis of Causal Effect Estimation using Outcome Invariant Data Augmentation.” *Advances in Neural Information Processing Systems (NeurIPS)*, 2025. **(Spotlight; top 3%)**   

A. Savkin, T. Lapotre, K. Strauss, **U. Akbar** & F. Tombari, “Adversarial Appearance Learning in Augmented Cityscapes for Pedestrian Recognition in Autonomous Driving.” *ICRA*, 2020. 

PROFESSIONAL EXPERIENCE

Teaching Assistant (Reinforcement Learning) @ *Georgia Tech*, USA **Aug. 2024 — Present**

- Authored RL projects for ~ 300 students/semester, including a `python` package for local `DeepRacer` deployment:
- Built a containerized simulation service with multi-runtime support (`docker` (`compose`) + `podman` + `apptainer`).
- Developed a client-side `gymnasium` wrapper to interface with the simulation service using `ZeroMQ` sockets.

Software Engineer Intern @ *Hewlett Packard Enterprise*, USA **June 2024 — Aug. 2024**

- Built CI/CD pipeline (`python` + `jenkins` + `JFrog`) to test/build/release/rollback VM templates for QA workloads.
- Integrated pipeline with dynamic KVM provisioning platform (`k8s` + `KubeVirt`) for scalable env. management.

Software Engineer @ *OMMAX*, Germany **Nov. 2022 — June 2023**

- Designed end-to-end Salesforce ETL pipeline (`Airflow` + `PostgreSQL`), improving data throughput by 58% (by refactoring `python` → `postgres`) and sales lead identification by 63% (by reducing data redundancy & duplicates).
- Built a serverless `FastAPI` microservice on AWS Lambda (`docker`) for `XGBoost`-based ticket classification and RegEx error code extraction. Served endpoints to a CRM platform to automate ticket routing and categorization.

Data Scientist @ *Auto1 Group*, Germany **June 2022 — Oct. 2022**

- Engineered `LightGBM` predictor for car refurbishment costs; €160 MAE decrease (~27.5% improvement) vs. prod.
- Automated training and eval. workflows; data extraction/transformation (Redshift) & model checkpointing (S3).

ML Research Intern @ *Max Planck Institute of Intelligent Systems*, Germany **Apr. 2020 — Feb. 2021**

- Developed a method to reduce hidden confounding bias w/ data-augmentation + instrumental variable regression.
- Basis of my Master's [thesis](#) @ TUM, [spotlight](#) @ NeurIPS 2025 and ongoing work in *geometric causal inference*.

TECH. STACK

Languages: `Python`, `C++`, `SQL`, `Bash` **Data & Backend:** `PostgreSQL`, `Airflow`, `Redis`, `FastAPI`
Testing & CI/CD: `Jenkins`, `JFrog`, `Git` **Systems & Orchestration:** `Docker`, `Linux`, `RabbitMQ`, `K8s`
Cloud: `AWS` (EC2, EKS, Lambda, S3, RDS, Redshift)
